

SOLAR STIK™

LITE-SERIES SOLAR STIK™ POWER PAK 100 / ERCO SYSTEM

ITEM # 010402 & 005016

OVERVIEW:

Imagine having all the comforts of home, including the power to run it all... with absolutely NO dependence on fuel or utilities... on the GO!

It has even been argued that the combination of the ERCO Pak and the Solar Stik™ 100 Lite is the most functional package system in the Solar Stik™ product line.

The Ergonomic Comfort Pak (ERCO Pak) is designed to provide users ranging from military to recreational with some basic services and added comforts that may be difficult to find in remote areas or after a disaster strikes. Each item of the ERCO Pak was carefully chosen to uphold the high standards of quality and performance set forth by Solar Stik™.

Every appliance in the ERCO Pak is ideally suited to work with the Solar Stik™ System. The Solar Stik™ Lite 100 & Power Pak 100 can generate and store up to one Kilowatt-hour of power per day (about 80 Amp-hours), and when in full use, the ERCO Pak appliances consume about one Kilowatt-hour of power per day.

The ERCO Pak can be assembled with products that are intended for any international market. When ordering, please notify the Solar Stik™ representative where the ERCO Pak is to be operated, and we will ensure that the proper inverters and appliance models are assembled into the ERCO Pak according to the destination.

The Solar Stik™ 100 Lite includes two padded cases, one for the Mast & Tripod assembly, and one for the Solar Panel assemblies.

The Pelican™ 0370 cube case will hold additional appliances should the user wish to supplement the ERCO Pak with more equipment that will tailor the it to the user's needs.
