

# LITE-SERIES SOLAR STIK™ & POWER PAK 100 SYSTEM

PACKAGE ITEM # 010402

## SOLAR STIK™

After 5 years, it has finally arrived...

Introducing the LITE-Series Solar Stik™ 100 & Power Pak 100 System Package!

This Stik™ System is the lightest and most compact system in the Solar Stik™ line, but can still generate and store a robust supply of electrical power... up to one Kilowatt-hour of power per day (about 80 Amp-hours)!

This system is specifically designed as a cost-effective solution for applications ranging from recreational to humanitarian. It can also be used in support of the other Military-grade Solar Stik™ Systems.

Like its siblings, the Lite-Series Solar Stiks™ have dual power-receptacles that allow for connection of additional Solar Stiks™.

This system makes a great constant power source for RVs, emergency home power, tools, computers, Humanitarian relief efforts, or even medical equipment!

The 30' Solar Power leash (included) allows for placement of the Solar Stik™ far away from the location of the Power Pak. This provides the user with the ability to work or operate in a shady environment (such as under a tree) while generating solar power.

The Lite-Series Solar Stik™ 100 includes soft panel transport cases. The Power Pak has wheels and an extending handle for easy transportation.

***This "Plug & Play" Package includes:***

Solar Stik™ 100 Lite  
Four ground securing stakes & mallet  
30' Solar Power Leash  
Power Pak 100 Lite
