

# SOLAR STIK™ 100 LITE & TERRA PAK SYSTEM

ITEM # 010400 & 000705

## SOLAR STIK™

Are you using a 12VDC battery for power at a cabin, in your RV, or other location that is not connected to the power grid?

Introducing the Solar Stik™ 100 Lite & Terra Pak! This tightly-packaged system is designed to provide independent power to any application that already has a 12VDC battery bank for power.

The Terra Pak can be used between the Solar Stik™ 100 Lite and an existing 12 Volt battery. The Terra Pak provides the necessary components for a permanent installation of the charging circuit, with "Plug & Play" operation of the Solar Stik™ as necessary. The Solar Stik™ 100 Lite can produce as much as one Kilowatt-hour of power per day!

Unlike a roof-mounted solar panel array, the 30' Solar Power leash allows for placement of the Solar Stik™ far away from the battery/vehicle location. This provides the user with the ability to place the Solar Stik™ 100 Lite in a location where direct sunlight may be more abundant than the immediate location of the 12VDC battery bank. Direct sunlight on the Solar Stik™ means more power!

The Solar Stik™ 100 Lite includes two padded cases for the Mast & Tripod assemblies and a pouch for the 30' Solar Leash.

***This "Plug & Play" Package includes:***

Solar Stik™ 100 Lite  
Seven ground securing stakes & mallet  
Terra Pak
