

SOLAR STIK™

## INTRODUCING THE SOLAR STIK™ 100 LITE SYSTEM

**PROVIDING “NECESSITY” & “QUALITY”...**

**...FOR LIFE**

Imagine being able to provide refrigeration, pure water, lighting, and other essential services where it is most needed. Quite often the applications are in remote, austere areas where fuel or battery re-supply is difficult.

Enter Solar Stik™ Inc. and its line of small-scale, light, deployable renewable energy power generators and appliances. Worldwide, military units and other government agencies already rely on our portable technologies to support of wide variety of missions.

***Proper Balance of power supplies & appliance loads***

Many companies only offer power generating technology, and others only sell appliances. This often leaves the buyer to wonder of they have the right combination of technologies for successful operation.

All Solar Stik™ Systems are designed around a simple factor... we call it “Usable Power”. In a 24 hour period, there is a measured amount of power that can be used. When a Solar Stik™ package is purchased, the buyer can rest assured that they are getting the best match of power generation & appliance technologies, maximizing the efficiency of the overall System and stretching the power budget to its maximum.

***Portable***

Our signature feature, ALL Solar Stik™ System components are D.O.T. certified safe for Land, Sea & Air transport. The Systems are compact enough to be checked as luggage on any commercial airline, yet strong enough to withstand the punishment of the baggage handlers!

***Scaleable***

All Solar Stik™ Systems can be expanded to meet demand when conditions warrant

***“Plug & Play”***

The Solar Stik™ System is designed for easy adaptation into nearly any application. All connections are “Plug & Play”, and setup can be performed by one person in usually less than 10 minutes.

***High Quality & No “Planned Obsolescence”***

All Solar Stik™ Systems are designed for long service life with minimal maintenance. Replacement parts, if necessary, can be ordered and usually replaced in the field.

SOLAR STIK™

## SOLAR STIK™ 100 LITE SYSTEM

### **H2O Paks**

The H2O Paks can provide up to 200 gallons of fresh, purified water from brackish, polluted, or even salt water!

### **Solar Stik™ Lite**

The Solar Stik™ Lite can produce up to 80 Amp-hours (or about one Kilowatt-hour).

### **R.A.L.S. Paks**

The Remote Area Lighting System (R.A.L.S.) Paks can provide incredible LED-based lighting, at a fraction of the Watt-consumption of traditional lighting technologies.

### **Power Pak 100 Lite**

The Power Pak 100 Lite can store up to 100 Amp-Hours (about 1 Kilowatt-hours) of 12VDC power .

### **Refrigerator Paks**

The Refrigerator Paks can provide reliable and portable refrigeration & freezing, using a minimal amount of power!

### **18V Rechargeable Tool Kit**

The 18V Rechargeable Tool Kit is a 9 piece complete contractor grade rechargeable tool kit for off site construction tasks. Designed for "Plug & Play" operation with Power Pak.

**See website for more information on these and additional products.**
